

PKI Suite – ETM

Enigmator Token Management

An administrator tool for Enigmator (PKI Email on IBM Domino). Administrator can release a locked Enigmator token or smartcard by challenge-response principle. It saves administration work, process time and reduce disturbance to users.

Features

Initialize Token with Unblock Function

It provides an ease to use initialization function for system administrator. The initialization process will enable unblock function for the token automatically. You can also set the token name, administration password length and assign the token owner at the same time.

Secured Administration Password

System will generate different random administration password for different token. The password is encrypted and protected. No one, not even system administrator, can retrieve this password but only the system processes.

Release Token by Challenge-Response Principle

No need to expose the administration password but it can unblock the token. System generates response code from secured administration password and user provided challenge code to release locked token.

Detail Action Log

System will log down all actions taken on token including initialization history, unblock history and owner history. It helps system administrator to trace the token details.

Device Inventory

It logged down all token devices information in your environment. It provides token series number, last initialization date and token owner. Administrator can export the device list to Excel file.

Technical Specifications	
Support Smartcard reader	CardMan 2010, 2020, 3x21, 4000
Support Smartcard	32k Enigmator Smartcard and 32k eToken Smartcard with PKI Client 4.0.0
Support Token	Enigmator 32K USB Token eToken Pro 32K USB Token

Trusted System Ltd is specialized in Messaging & Collaboration Enhancement Solutions. We develop various products under TrustSafe brand with an aim to provide innovative, valued added and cross platform solutions to meet our customers' extra needs. Our products include PKI based Confidential Mail System, Email Compliance Manager, Multi-Factor Authentication, Domino Migration Tool and SharePoint Integrator.
